

Our 4000 m2 shipyard is located in Antalya Free Zone, Turkey's heart of modern yacht building, where all kind of vessels up to 70 meters are being built and repaired.

We are capable of offering highly qualitative services when it comes to yacht building. A highly professional, dynamic, unionized team that is always prepared to take into account the needs of its customers. For achieving the best results, our naval architects take part in both project design and project management process. Each detail is then completed in line with the engineering team.

Our shipyard is equipped with furniture installation workshops, chrome, mechanical fitting and paint-varnish shops. Some of the services provided within our covered area of 4000 m2 shipyard are:

1. Steel and Aluminum Yacht Building

4. Refit for all types of vessels
5. Increasing the length, width and the depth of yachts
6. Furniture Manufacturing
7. Yacht paint jobs
